

NEW

M·PRO Series

4mm MINERAL GLASS FILTERS

World leader as manufacturer of professional filters for still photography, COKIN is now launching its new M-PRO Series especially created for film, television and video markets.

Designed by COKIN R&D department for high definition lenses and sensors, the new COKIN M-PRO filters are on the cutting edge of the latest technologies and materials.

BEST TECHNOLOGIES, BEST MATERIALS

- High optical and physical properties
- Multi-sides polishing for total flatness and perfect parallelism
- Colour consistency and chromatic accuracy
- High precision for increased image sharpness
- Full potential when used with the best lenses on the market.

BEST MANUFACTURING STANDARDS

- Special care to all steps of the manufacturing process
- Quality control without compromises
- Benefits from the whole COKIN® know-how.

THE RANGE

Compatible with most Matte Boxes on the market as well as with the COKIN Z-PRO filter-holder, the new M-PRO range (4mm thick) exists at start in most common sizes : 4"x4" and 4"x5.65". COKIN will then also provide in the near future other square and round formats for the best satisfaction of the whole users in cinema, television and video.
