

The Conversion Lenses with Magnetic Fixation for increase or reduce the angle of vision of photo phones

COKIN, French well-known specialists in Digital Photography and Imaging for years, are launching a range of revolutionary universal conversion lenses that will boost the capacities of personal Digital Imaging equipment.

Main Features

The new COKIN MAGIK-PHONE Lenses feature magnetic attachment. They can be used with many picture phone thanks to a unique metallic ring that sticks around the lens.

The COKIN MAGIK-PHONE Lenses includes two models: Wide-Angle x0.5 and Telephoto x2.0. They modify the angle of vision into a much wider image (Wide-Angle x0.5) or a much closer image (Telephoto x2.0).

WIDE-ANGLE x 0.35

R760-MXS

TELE x 2

Attachment & Security

- Attachment on the picture phone via an adhesive metallic ring that sticks around the lens.
- Attachment on MAGIK-PHONE lens side via powerful magnetic fixation.
The converter will not fall off under normal conditions of use.
- Tests have been made to ensure that the magnetic system does not create interference with phone devices.
